v1.4.0	Mobile and Tablet Fair Play	Responsive phone/tablet layout, tap targets, mobile food grid, popup fixes

v1.0.0 - Rocky Snack Shack Launch

Summary: The first complete version of the Rocky food-themed easter egg site.

Added

- Created the Rocky-Snack-Shack-of-Chaos website.
- Added a full-screen food-themed homepage starring Rocky.
- Added the Aussie shepherd food game.
- Added random food icons on every visit.
- Added clickable food tossing toward Rocky.
- Added hidden treat bag with an in-page video popup.
- Added welcome popup and fake terms popup.
- Added credits popup and typed commands menu.
- Added GitHub/social preview metadata.
- Added transparent tab logo.

Easter Eggs

- AWOO command.
- HOTDOGZ command.
- RIVER command with River cameo.
- BARK command with Bark Translator.
- SQUIRREL command.
- BRAIN command.
- Boop counter.
- Zoomies paw button.
- Rocky autograph pencil.
- Fortune cookie advice.
- Taco recipe button.
- Amazon package button.
- Snack debt message, snack receipt, snack court, and nap mode.

v1.1.0 - Fixes, Mobile, and More Chaos

Summary: A stability and usability pass focused on buttons, mobile behavior, and clearer placement.

Added

- More boop milestone messages.
- Boop cap at 10,000.
- Safer taco recipe links.

- More fortune cookie advice.
- Non-repeating fortune behavior.
- Non-repeating taco recipe behavior.
- Neon Snack Sign title flicker animation.

Changed

- Renamed browser tab title to Feed Rocky.
- Changed homepage title to Rocky-Snack-Shack-of-Chaos.
- Linked homepage title to the GitHub repository.
- Moved title lower and made it smaller.
- Improved spacing for food and buttons.
- Moved top buttons into a cleaner top-right stack.
- Moved tennis ball, bone, and paw into a corner group.
- Made booping not move the food-game Aussie.

Fixed

- Fixed buttons not working after popup screens.
- Fixed Terms button and LETS GO button behavior.
- Fixed missing background nose button issue.
- Fixed script-breaking issue when optional buttons were missing.
- Fixed mobile command usage by adding command input.
- Fixed tab logo path and transparent tab logo file.
- Fixed layout clumping.
- Fixed taco button placement.
- Fixed paw, bone, and tennis ball button placement.

v1.2.0 - Polished Replacement Release

Summary: The latest upload-ready version, rebuilt as a cleaner replacement package with stronger layout and interaction handling.

Changed

- Moved title lower toward the middle so the background words are more visible.
- Made the title a bit smaller for better spacing.
- Placed taco, pencil, box, and cookie controls along the top-right area.

- Placed tennis ball, bone, and paw in the bottom-right corner group.
- Styled the paw icon white-ish while keeping the paw symbol.
- Expanded boop messages so they continue past 300 boops and cap at 10,000.

Fixed

- Rebuilt the site files into a cleaner upload-ready replacement folder.
- Reduced chance of one missing element breaking the whole site.
- Added safer button event handling.
- Cleaned up layout positioning.
- Made the bottom-right control group harder to accidentally place on the wrong side.
- Updated README with site info, features, credits, and contact info.

Notes

- Upload the files inside the replacement folder, not the zip file itself.
- Keep the existing assets folder because the site uses images from it.
- Do not upload the outputs folder to GitHub.
- After upload, wait for GitHub Pages to finish deploying, then hard refresh the site.

v1.3.0 - Icon Rail and Treat Polish

Summary: A visual polish release for the newest control layout and hidden treat button.

Changed

- Moved the top-right icon row upward while keeping the same order: box, fortune cookie, taco, pencil.
- Changed the bottom-right controls from a stacked column into a side-by-side row.
- Kept the bottom-right order as tennis ball, bone, paw.
- Made the hidden treat bag much more transparent.
- Removed the visible "treats" word from the treat bag button.
- Rebuilt the upload zip so the replacement folder and zip match.

Notes

- YouTube ads cannot be forced off by site code.
- YouTube controls ads based on the viewer, the video, and the account or subscription.
- The only truly ad-free option is to use a video file owned by the site owner or host it somewhere that does not insert ads.

v1.4.0 - Mobile and Tablet Fair Play

Summary: A responsive usability release so phone and tablet visitors can use the same features available on desktop.

Added

- Added tablet-specific layout handling for medium screens.
- Added mobile-safe spacing using modern viewport sizing.
- Added larger tap targets for icon buttons on touch screens.
- Added scrollable popup panels so modals work better on smaller screens.
- Added better mobile command input behavior so phones do not zoom in awkwardly while typing.

Changed

- On mobile, food buttons now become a clean tappable grid instead of floating into awkward spots.
- On mobile, the Aussie food-game dog is resized so it does not crowd the controls.
- On mobile, the top icon row stays reachable near the top.
- On mobile, the bottom-right controls stay side-by-side and reachable near the bottom.
- Toast messages, receipts, and snack debt popups now fit better on narrow screens.
- Hidden treat bag position and size are adjusted for smaller screens.

Fixed

- Fixed mobile food spacing so labels and icons are less likely to overlap.
- Fixed popup panels being too tall for phone screens.
- Fixed small-screen controls feeling too tiny to tap fairly.
- Fixed some bottom controls getting too close to phone safe areas.

Notes

- Upload the files inside the replacement folder, not the outputs folder.
- The desktop layout remains intact while smaller screens get their own safer layout.

Current Boop Milestones

Boops	Message
10	okay that's a little too much.
25	You have unlocked suspicious boop behavior.

50	The nose has entered witness protection.
75	Rocky is filing a formal snack complaint.
100	Boop license revoked.
125	Boop economy in shambles.
150	The nose is now a historical landmark.
300	Rocky has contacted snack legal.
500	Snack legal has escalated the case.
750	The nose has entered overtime.
1,000	This is no longer a boop. This is a lifestyle.
1,500	Rocky has requested a boop audit.
2,000	The boop department has stopped answering calls.
3,000	Rocky's nose is now protected by ancient snack law.
5,000	The snack council is holding an emergency meeting.
7,500	Rocky has transcended ordinary nose physics.
10,000	The boop counter has reached its final snack form.
